CAREER OBJECTIVE

Motivated B.Tech student passionate about AI and problem-solving. Experienced in building academic and hackathon projects using AI-assisted development tools. Seeking to learn AI-powered web development, contribute to real-world projects, and grow through hands-on experience.

WORK EXPERIENCE

AI Web Development • Internship Jun 2026
Inamigos Foundation, Virtual

- Contributed to AI-assisted web development projects by designing and improving website interfaces.
- Conducted website audits to identify usability, accessibility, and UI/UX improvement opportunities.
- Created website redesign concepts and feature proposals for NGO websites.
- Built responsive frontend layouts using HTML, CSS, and JavaScript with AI-assisted development workflows.
- Designed UI mockups and feature highlights to enhance user experience and website functionality.
- Documented project findings and shared progress through technical reports and professional updates.

EDUCATION

B.Tech, 2025 - 2029
The NorthCap University - Best Engineering University In Delhi NCR

Senior Secondary (XII), CBSE 2025
Science

Gyanodaya Public School, South West Delhi

Percentage: 86.50%

Secondary (X), CBSE 2023
Gyanodaya Public School, South West Delhi

Percentage: 92.20%

PROJECTS

Global Energy Risk Monitor System
May 2026

Integrated AI-assisted workflows for insights and reporting.
Improved data visualization and user experience features.
Built a web-based platform for monitoring global energy risks and geopolitical events.
Contributed to dashboard design, analytics, testing, and debugging.

Library Management System (C++)
Mar 2026 - May 2026

Independently developed a library management system using C++ and OOP concepts.
Implemented book management, member records, and user authentication.
Applied inheritance, polymorphism, classes, and modular programming.
Used file handling for persistent data storage.

Quiz Game System (C)
Sep 2024 - Dec 2025

Independently developed a quiz application with scoring and performance tracking.
Implemented user authentication, leaderboards, and attempt history features.
Added support for multiple question types and answer validation.
Used file handling for question management and result storage.

ATM Simulation System (C)
Sep 2025 - Nov 2025

Independently developed a banking simulation system in C.
Implemented account creation, login authentication, balance management, and fund transfers.
Maintained transaction history and persistent account data using file handling.
Focused on program structure, security, and user interaction.

BioLynk – Blood Donor Coordination Platform ↗

Feb 2026 - Present

- Developed and managed a blood donor coordination platform during a hackathon.
- Participated in project planning, testing, debugging, deployment, and feature discussions.
- Worked with Firebase services and AI-assisted development tools.
- Presented the project to judges, mentors, and university stakeholders.

SKILLS

- C Programming
- C++ Programming
- Object Oriented Programming (OOP)
- Problem Solving
- Typing
- Self-learning
- Prompt Engineering
- Team Management
- Collaboration
- VS Code
- Debugging

EXTRA CURRICULAR ACTIVITIES

- Participated in Hyperspace Innovation Hackathon 2026.

  Contributed to the development and presentation of BioLynk during hackathon and university project showcases.

  Completed 40 hours of certified community service at YATAN NGO.

  Actively involved in project pitching, technical discussions, and team-based development activities.

ADDITIONAL DETAILS

- Dean's List Recipient with a CGPA of 9.63 in the first semester of B.Tech. Attended India Mobile Congress (IMC), AI Summit, and Generative Mastermind by Outskill. Received university funding and mentorship for the BioLynk project.
